Cocopeat or Coir

Coco peat (cocopeat), also known as coir pith, coir fiber pith, coir dust, or simply coir, is made from coconut husks, which are byproducts of other industries that use coconuts. Cocopeat primarily consists of the coir fibre pith or coir dust which is obtained by processing coconut husk and removing the long fibres. The cocopeat which is obtained can hold large quantities of water, just like a sponge. It is used as a replacement for traditional peat in soil mixtures, or, as a soil-less substrate for plant cultivation...

Usually shipped in the form of compressed bales, briquettes, slabs or discs, the end user usually expands and aerates the compressed coco peat by the addition of water. A single kilogram of coco peat will expand to 15 liters of moist coco peat.

We the Merchant exporter of Exporters of coco peat 5kg blocks, 1kg blocks, coco peat 650grams bricks, coco coir grow bags, husk chips blocks and cut- fibers in South India, TamilNadu.

Coco peat is used as a being a good absorbent, dry coco peat can be used as an oil absorbent on slippery floors. Coco peat is also used as bedding in animal farms and pet houses to absorb animal waste so the farm is kept clean and dry. Coco peat is hydrophilic unlike sphagnum moss and can quickly reabsorb water even when completely dry. Coco peat is porous and cannot be overwatered easily.
